What it
SOLVES

MACHINE LEARNING,
The Process

01. DATA MINING

Harvesting the data or receiving them directly from the involved people.

02. ALGORITHM

Apply many different Algorithm to slice and analyze all the received information

03. CLASSIFICATION

Classify the incoming object using multiple criteria.

04. LEARNING

Learn from its errors to improve the system

05. NEURAL NETWORK

Train itself in the identification, recognition and classification challenges.

06. DEEP LEARNING

Use DeepLearning tecniques to understand the information context.

07. AI

Use the AI power to unleash the information content.

08. AUTOMATION

Automate the process to scale at the people level.
